DETAILED ACTION

Restriction election

1. The Office acknowledges the receipt of Applicant's restriction election filed January 5, 2006. Applicant elects Group I, claims 1-10 and SEQ ID NO:5, without traverse. Claims 1-23 are pending. Claims 11-23 and SEQ ID Nos: 6, 7 and 8 are nonelected. Claims 1-10 and SEQ ID NO:5 are examined in the instant application. This restriction is made FINAL. Applicant is reminded to cancel non-elected inventions from the claims as appropriate (claims 5, 10 and 11-23).

Information Disclosure Statement

2. Initialed and dated copies of Applicant's IDS form 1449 filed Oct. 1, 2004, Aug 19, 2004, May 6, 2004 and Mar 19, 2004 are attached to the instant Office action.

Claim Rejections - 35 USC § 101 Utility

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 2, 6 and 7 are rejected under 35 U.S.C. 101 because these claims are drawn to nonstatutory subject matter. The seed of claim 2 does not necessarily contain the recombinant nucleotide sequence because of segregation of genes during seed production, and thus reads on a product of nature. Similarly, the composition of claims 6 and 7 do not require that the plant material or seed be transgenic, and since a plant or

Art Unit: 1638

seed can cause an immunogenic response in fish (allergenic or poisonous plant material) when taken in by the fish, it reads on a product of nature.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-4 and 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Koprowski et al. (US Pat. No. 5935570 (A)). Koprowski teaches a plant and seed expressing a fish antigen including from the fish pathogen birnaviridae (col. 7, ln. 24) which can be administered with an adjuvant (excipient) (col. 8, ln. 2). Accordingly, Koprowski anticipated the claimed invention.

Remarks

8. Claims 5 and 10 are objected to as being dependent on rejected claims but would be allowable if rewritten in independent form and without the non-elected inventions.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuong T. Bui whose telephone number is 571-272-0793.
